## KEYNOTE SPEAKERS

### Prof Stephanie von Hinke

Stephanie is a Professor of Economics at the University of Bristol. Her research investigates the importance of genetics, early life environments, parental investments, and government policy in explaining individuals' health and well-being over the life course.

Stephanie's work has been published in leading general interest and field journals in economics such as *The Economic Journal*, *European Economic Review*, *JEBO*, *Health Economics* and *JHE*. She is the PI on a 5-year European Research Council (ERC) Starting Grant (2020-2025) that aims to incorporate genetic data into social science research and study the importance of the nature-nurture interplay in the developmental origins of health and disease. She is also co-PI (with Titus Galama) for a 4-year Marie Skłodowska-Curie Actions (MCSA)/UKRI Doctoral Network (2023-2027) to train a cohort of PhD students in social science genetics.

Prior to her current role at the University of Bristol, she was a Professor of Health Economics at Erasmus University Rotterdam (part-time; 2018-2022). She also held an MRC Early Career Fellowship in the Economics of Health (2011-2014) at the University of York, and an ESRC Post-Doctoral Fellowship at Imperial College London (2009-2011). She also held visiting positions at Cornell, IFS, and VU University Amsterdam.

Stephanie is a Research Fellow at Tinbergen Institute, a Research Associate at the Institute for Fiscal Studies (IFS) and a Research Fellow at the IZA. She is also a member of the Royal Economic Society Committee.
