ANNOUNCEMENT AND INVITATION FOR PARTICIPATION

Dear Colleagues,

On behalf of the Organizing Committee of the International Scientific Conference „Perspectives in Paediatric Cardiology“, we would like to invite you to participate at the Conference, which will take place from 20th to 22nd September 2012 in Dubrovnik.

The Conference is organized by the Academy of Sciences and Arts of Bosnia and Herzegovina (ANUBiH), Vienna General Hospital (AKH Wien) – Department of Paediatric Cardio Surgery, University Medical Centre Ljubljana - Paediatric Clinic-Department of Paediatric Cardiology, within the Academic programme 2011/2012 of the Inter University Center (IUC), Dubrovnik.

The programme will consist of the invited lectures which will be given by distinguished experts with international expertise in their respective fields.

CONFERENCE AIMS AND SCOPE

The International Scientific Conference „Perspectives in Paediatric Cardiology“ has the aim to highlight the present status of paediatric cardiology with a view of genetics in molecular biology, cardiac anatomy, morfohaemodynamics, sequential segmental analyses, imaging techniques including foetal echocardiography, hypertension, atherosclerosis, electrophysiology and cardiosurgery. Improvements in diagnostic modalities of congenital heart disease, especially imaging techniques, surgical and interventional as well as postoperative intensive cardiac therapy and care have contributed to the significant decrease in mortality and morbidity in congenital heart disease. The understanding of factors that influence heart development and its structure and functional development could produce the information in connection with pathogenesis of congenital heart anomalies and detect early mechanisms of controlling development of acquired cardiovascular disease in adulthood. Keynote speakers on these topics with international expertise in their respective fields are a guarantee of success for this international meeting.
